OBJECTIVE

seeking an entry-level AI/ML role where I can apply my skills in Machine Learning, NLP, Blockchain, Computer Vision, and Generative AI to build scalable real-world solutions and grow as an industry-ready professional.

EDUCATION

B.Tech. Computer Science & Engineering, *Sir Padampat Singhania University* 2022 – 2026
• CGPA: 8.2 Udaipur

12 CBSE, *Eden International School, Bhilwara* 2021 – 2022
• Percentage: 69.6 Bhilwara

KEY SKILLS

- Artificial Intelligence, Machine Learning (Supervised, Unsupervised, Reinforcement), Python, NLP, Computer Vision, Prompt Engineering, Microsoft Azure, Deep Learning, Neural Networks, C++, API Integration, Web Development, OCR, OpenCV, LangFlow, n8n, Streamlit, Git, TensorFlow, Scikit-learn, MySQL

INTERSHIPS

AI/ML Engineer Intern, *Xebia* 06/2025 – 07/2025
• Gained hands-on AI/ML experience with real-world datasets, EDA, classical ML models, NLP, Autoencoders, and deployed end-to-end Streamlit applications on Microsoft Azure. IT/Computers Software

Machine Learning Engineer Intern, *LaunchED* 02/2025 – 04/2025
• Completed a 60-day ML & GenAI program focused on model tuning and prompt engineering, delivering 10+ projects with NLP, chatbots, and React/API integrations. IT/Computers - Software

PROJECTS

PathGenie App 07/2025 – 07/2025
• Built **PathGenie**, an AI-driven recommendation app that uses ML to generate personalized learning or career paths with dynamic suggestions and visualizations based on user goals.

AI Agent Orchestration System 06/2025 – 06/2025
• Developed AI-driven email automation agents using LangFlow and n8n to parse, classify, and route emails and attachments, enabling real-time Gmail ingestion and structured JSON workflows.

RL-Powered Smart Timetable Generator 11/2025 – 11/2025
• Built a Deep RL (PPO)-based university timetable scheduler with custom Gym environment and reward shaping, deployed via an interactive Streamlit app for training and generation.

Eyes360 – Workplace Activity Monitoring 12/2025 – 12/2025
• Built a real-time workplace monitoring system using OpenCV and deep learning to detect safety and activity violations, with alerting, screenshot logging, and a multi-camera Streamlit dashboard.

ACHIEVEMENTS

- Secured First Place in SPSU Byte Clash Techno Event at Panache 2025
- Second Runner-up at CVMU Hackathon 2024 for Smart Library System (IoT)
- Second Runner-up at FIU USA Ideathon 2025 for Smart Library System (IoT)
- Participated in Smart India Hackathon 2022 with Blockchain-based Document Verification System
